WATER TREATMENT PRODUCTS

DESCALERS & BIOCIDES

Without effective water treatment, a cooling water system can suffer from scale formation, corrosion and fouling and may become a breeding ground for harmful bacteria such as those which cause Legionnaires' Disease. This reduces efficiency, shortens plant life and makes your operation unreliable and unsafe

Poor control can not only put your cooling process at risk, but can also squander thousands of rupees in wasted energy, chemicals and water charges.

To overcome these problems we've developed a comprehensive range of products and services to keep your system operating safely and efficiently.
